

§1 | WARRANTY

- §1.a. ASB generally grants a warranty of 60 months to squash courts and to completed work. All devices and equipment, purchased from other suppliers, such as electrical equipment, air-conditioning, electronic devices, etc., are covered by the same warranty as offered by their manufacturers. Marking lines are given a warranty of 24 months.
- §1.b. The warranty covers any defects that occur due to non-compliance with quality of the completed work while respecting the operating and maintenance instructions for squash courts. Defects or damages caused by extensive variations in air humidity are not covered by this warranty.
- §1.c. ASB does not bear the warranty for glass parts after the installation. It is recommended that the Buyer arranges an insurance for the glass parts.

§2 | DELIVERY TIME

- §2.a. The determined delivery dates can be affected and changed by force major, riots, strikes, lock-outs and unpredictable accidents or other unforeseen events. Delays caused by customs or above mentioned accidents are not within our range of responsibilities.

§3 | PRECONDITIONS OF DELIVERY

- §3.a. If the ASB components are delivered by truck, it has to be ensured that the delivery can reach the construction site without hindrance and stay there during unloading, even under bad weather conditions.
- §3.b. The transport path from the place of discharge to the place of installation has to be hard-surfaced. For squash court elements transport into the building, openings with minimal dimensions of 1,4 × 2,5 m have to be ensured for the complete transport path length.
- §3.c. If squash courts are not installed at ground floor level, project transportation requirements will be adjusted.

§4 | PRECONDITIONS OF INSTALLATION

- §4.a. Before the squash courts installation the area of installation has to be ventilated and heated, with the air humidity not exceeding 65 % and the room temperature not falling below 15° Celsius. If these conditions are not met, the installation can be postponed. Any delay does not lie within our responsibility and additional costs may be charged.
- §4.b. The building raw floor has to be even, allowed deviations are +/- 10 mm for each 10 m of length. If the deviation exceeds the permitted values, floor leveling can be done by ASB for additional costs. The building raw floor has to be sealed against rising humidity.
- §4.c. If the delivery includes an ASB Movable wall, Buyer has to provide a power supply according to ASB requirements.

§5 | CONCLUDING CONDITIONS

- §5.a. The Buyer shall acquire the ownership title to the purchased goods only after the payment in full of the total purchase price. If the Seller decides to exercise the right to take back the purchased goods as a result of non-payment of the total purchase price, the Buyer shall be obliged to prepare the purchased goods in their entirety for the Seller at the place and time specified by the Seller so that the Seller is able to collect them, free of any defects and damage and in a condition allowing safe transport.
- §5.b. In case of order cancellation or reordering by the Buyer, the Seller is entitled to demand, without further proof of the loss, up to 5 % of the total invoice amount plus extra charges as a compensation. The Buyer is entitled to prove to the Seller that the respective loss was considerably less or not affected at all. The Seller has the right to ask for compensation of a considerably higher loss if this can be proved.
- §5.c. Technical conditions and floor bearing capacity have to be provided according to ASB specifications and designed solution. Any changes in the designed solution have to be approved by both sides prior to the delivery.
- §5.d. In case of the need for waste removal and disposal extra costs will be charged.
